## Front End Developer

*Seeking a position as a Frontend Developer to apply my knowledge of Front-End Development with application of UI/UX design principles.*

## Education

### Digital Design and Development

British Columbia Institute of Technology (BCIT)

September 2021 – June 2023

## Project Experience

### Raincheck - 2023 | NextJS, RapidApi, Styled-Components, React D3, Framer-Motion

*Frontend Developer*

- Researched and evaluated user requirements to inform the design of a map-based web app.
- Designed and implemented the frontend user interface using NextJS.
- Developed a card UI for the map on the app page, using styled-components.
- Linked the frontend elements to the server-side API, utilizing `getServerSideProps` from NextJS for data retrieval.
- Collaborated with a team of developers to deliver a functional and user-friendly web application in a hackathon setting.

### Tweetaholic - 2022 | EJS, NodeJS, ExpressJS, MongoDB, Mongoose, Nginx, CloudPanel, AWS EC2

*Full Stack Developer*

- Developed a full-stack web application using EJS, an Express server, and MongoDB as the database.
- Implemented authentication using JWT and bcrypt to ensure secure access to the application.
- Styled the user interface using CSS to create a sleek and modern design.
- Deployed the application on a Linux server using an Nginx proxy to handle incoming requests and improve performance, and PM2 for daemonizing the deployment.
- Conducted extensive testing and debugging to ensure the application was fully functional and optimized for performance.

**First Maps - 2022 | NextJs, RestAPI, NextAuth, Figma, AWS S3**  
*Frontend Developer & UI/UX Designer*

- Researched and evaluated the viability of creating an indigenous mapping app.
- Designed the main page, intro page, and map page of the app.
- Developed the parts of the app that were designed, using Nextjs.
- Assisted team members in debugging their code and ensuring code quality.
- Spearheaded the project in the early phases, guiding the team in the direction to start the development.
- Collaborated with a team of developers to deliver a functional and user-friendly indigenous mapping app.

**Pronunci-Asian - 2022 | NextJs, Styled-Components, Figma**  
*Frontend Developer*

- Developed the main introduction page using Next.js, a React-based framework.
- Implemented a dark mode feature to improve user experience and accessibility.
- Developed a settings page with the ability to change font and font sizing, improving customization options for users.
- Assisted team members in debugging issues and ensuring code quality.
- Contributed to the overall layout and design of the web application.
- Collaborated with a team of developers to deliver a high-quality and user-friendly web application.

## Languages, Frameworks, and Databases

- JavaScript
- HTML
- CSS
- React
- next.js
- WordPress
- NodeJS
- MongoDB
- Firebase

## Applications

- Adobe Creative Suite (Illustrator, Photoshop, After Effects, Premiere Pro)
- Visual Studio Code
- Figma
- Github
- Windows/macOS/Linux (Ubuntu)
- WSL2/Bash/cmd
